Of course, the culminating point of the game is also very obvious, compared to the previous years, "the incredible spider-man" has greatly improved, both the quality and performance have greatly improved. For example: Spit Gossamer lets you feel the player who is really glued to the building. In the new game "The Amazing Spider-Man 2", players are more likely to experience realism in the game, you can swing in the sky, you can also crawl on the wall, the game quite well managed; Players can even hear the sound of the car horn, the game experience is pretty exciting. In the game, a closer look on the screen, not only the spider-man clothes lines, the walls of the reflector building, even the spider-man blindfold above the reflective are made. The entire process voice plus a large number of animation of the process Dean deeply felt sinnerity. The screen was fundamentally impeccable, we can see from the image, compared to the previous case, our most distant perspective, much more attractive mapping. Before the move because too fast to move the memory reflects the mosaic phenomenon was the perfect solution. In addition to the number of frames in a certain fine screen is not yet ideal (which is also limited by performance). Also this image quality, even on the PC side is completely triggered. Continuation of work, the extraordinary Spider-Man 2 is also a sandbox game, high degree of freedom. In addition to the history of the main line, we can swing around New York City looking for citizens needed to help and defeat the wicked criminals. So back to the main story, for this we need to solve the six famous comic superman comic comics. In addition to the preface of the teaching level, the game has a total of six chapters, and the figure is the first chapter of the Boss - Blood Blood, Oh no electro-optical people. Operation above, status not combat, in addition to the direction of the virtual barbell regulation there is only one button to jump, press the jump button a long spider's silk in the air waves. This operation still requires some practical skills to start, because it is not a direct flight, the novice in air easily lost and hit the building. However, for the automatic adjustment of the above perspective to do very well, just play half an hour, I think we can compete. More than this, this for the Spider-Man action in the vertical wall automatically converts the appropriate perspective, make the operation easier. In the air when the action and its coordination, completely restored the action of the original film. But since it is in wounded citizens at the hospital, we are embarrassing to go is not (as shown above)? Fight the refreshing â €
