Press ESC and click "abnormal coordinate escape" or type / escape (you can copy and paste too) * Linear Ray: LV1. This ability is one of the main reasons why I choose to venture the laser tree. The ability of gravity ascension is very useful when fighting an enemy that has no escape, as a warrior or clan. However, Cerberus can be fixed with gravity ascend, allowing his party member to cause him to safety with 6 ~ 7 sec. Force users can manipulate the time and space around it, giving allies great opportunity to use strong spells with short none cooldown, and also threaten the enemies stopping the time in the The chosen area. Oh, yes to fight the enemy who had the escape, as a sorceress class you must ensure that the escape was the delay was yes. So that the position must be discarded from Rank 1 to 3 top Majesty DPS. It is not a new skill, but learning this will improve the ball of gravity. You do not need SP to learn. * Stop time: LV5. This construction also gives you the chance to try the spectrum bath, which is the signature movement of the laser tree with incredible AEEE and damage. However, it is necessary to learn the following skill. Majesty Majesty can use her talent to read the enemy's fans and steal one for herself with the movement of his wrist. Spike Glacial is a great DPS skill, with short CD, long range, chance of freezing and short time of foundation. I believe this ability is superior to the spectrum shower because it has no blinking point (Spectrum shower can not hit the body's body) and the damage is induced immediately after the cast (Spectrum shower has much slower casting time). One of the most powerful deactivation skills in the game. Have in mind also, debuff of the gravity of the active ascension when the end of the cast. I can not imagine what will happen later job work, including this majesty. Meteor Storm JÃ © 90, but did not give the status of the invulnerable developer cast the Majesty's fit, in fact, the improved damage is quite loud, but I was still excited every launch of this ability . Jade / Jewelry Armor: INT + VIT Atau Int ® Crit Waacha Â® Ring: Dark + Int Necklace - Earring: Int ® Vit Atau Int + Criter Heraldry + Magician, Intellect (Said), Saúde, Vitality of Life , Tent, Shinning (Iron Wall), Fatal Dan Ultimate / Abenanced DPS Potential Information: - Used gear are similar to the forcing analysis class - User Damage / DPS and full buijo build / debuff skill build build pve build for more wardrobe blast of wheels team against the explosion empty to the contrary of the ability compilion of Smasher, the majesty level of empty explosion 26 (25 + 1) can compensate for the potential of the DPS wheel team. Accelerate the cooldown for all the skills of all party members and yourself (not counting this skill) by 80% for 14sec in LV3. This is an extremely powerful skill. Just pray for the LVL32 lid to be opened soon ^ _ ^ lv32 cap when cerberus nest is released, force force can see a climb in popularity because of the ability to disable most bosses in the nest. Explosive damage is larger than touch damage. It is classified top 3 in terms of damage / foundation time in all the ability of Majesty. Good to recover the position after you are floated in the air. And, of course, the time acceleraton and stop time are extremely powerful in highlights of pvp.discussion: Here I will connect some important discussions and FAQ in this topic to facilitate reference: Acceleration of time versus comparison Spirit Boost's DPS with Elemental Lord, Master of Arch and Academic Why the wave of the learning force and gravity launch is better than the show of spectrum or 9-tail laser? The first direction damage is reduced, then the effects of passive damage of 65 doubles are also reduced. However, you will lose the ability to deactivate the ascension of gravity. Clear antique library. I prefer to summon comet because it's easier for a success. However, the damage is not so good against minor size targets. * Meteor swarm (meteor storm): LV1. My hoping still modest, can damage the severity switch ^^ * Teleport: LV1. While the ball is traveling, it causes small damage to what he touches.
