Effectively filling the gaps provided by Shelley's novel, this film provides a ghastly look at his first hideous, soulless attempts at creating life, which predate the sympathetic, flat-topped creature as portrayed by Boris Karloff that we all know and love. That being said, this film owes much more to the film adaptations of Frankenstein than the book itself. A tip-off is the prominent inclusion of Igor, an invention not of Shelley's but of Universal Studios, who cast the incomparable Dwight Frye as Fritz in James Whale's "Frankenstein" 1931 , which morphed in Ygor and finally Igor in subsequent sequels and adaptations. Bearing a somewhat misleading title, the film is really Igor's story. Working as a nameless freak in a circus due to his physical deformity which Radcliffe portrays brilliantly; he could be the next Lon Chaney Sr. , he is a stranger to kindness until he meets Victor, who recognizes his brilliant mind and vast medical knowledge. Igor is given a new appearance, a new name, and a new life by his generous benefactor, on the condition that he work as Victor's partner and assistant, bringing his expertise to animating individual body parts for use in the highly-strung medical student's unholy enterprise. Victor, in his megalomania, as the "creator" of Igor, demands his complete loyalty, something that is easy for the grateful younger man to give until he strikes up a romance with Lorelei, the aerialist he worshiped from afar during his time at the circus. Slowly, he begins to see beyond his unwavering devotion to the disturbed madness of Victor's mania for creating life out of death.To add to the conflict, Victor and Igor find themselves being pursued by the Javert-like Inspector Turpin Andrew Scott , who, as a man as consumed by his religion as Victor is by his rejection of it, refuses to rest until he and his ungodly experiments are brought to an end. This gives the film a chance to explore the cautionary message present in Shelley's novel about trying to control to forces of nature in further depth than simply showing the misbegotten monsters alone.Visually, "Victor Frankenstein" is a treat. Turn-of-the-century London is portrayed in equal parts glittery and grimy, with period-appropriate costumes and hair adding to the effect. You can't have a "Frankenstein" movie without a few dead bodies, and this film is not shy about showing the various viscera, though it is all for a purpose and is far from excessive, with much less blood, gore, and grotesqueness than I was expecting. Much more is implied than actually shown in detail. As someone who avoids modern horror films for their indulgence, I applaud the filmmakers' restraint. The action scenes, which number precisely four and take up less than a quarter of the film's one-hour and forty-nine minute running time, are brief but intense, though rather tame when compared with your average action movie. They give Radcliffe a chance to utilize his gift for physicality, which he plays to the fullest. Yet for all its trappings as a horror film, the heart of "Victor Frankenstein" is the relationship between Victor and Igor. Both social misfits, they find themselves appreciated for who they are for the first time in their lives. It soon becomes very clear that Igor is the only real friend Victor has in the world, and that the latter, for all his grandiloquence, needs his lowlier creation more than Igor needs him. The chemistry between Radcliffe and McAvoy is there and is what makes the entire film tick. They both give equally strong performances individually, with McAvoy perfectly capturing the monomaniacal, socially awkward mad genius, a sharp complement to Radcliffe's soulful, loyal, levelheaded partner, but together they are a powerhouse, bringing delightful touches of humor and pathos to an otherwise rather serious film. More than once I felt myself growing teary-eyed. How many horror films can do that? As to the many negative reviews, I don't believe the critics and I watched the same movie. The pacing and focus was tight, the acting good, the film itself a rather straightforward drama with dashes of horror and action thrown in rather than a mixed bag, and the various subplots, rather than distracting from the main plot, came at the appropriate times, and helped to move it along. The only faults I found were the slight overuse of slow-motion in the action scenes, the rather quirky choice of superimposing anatomical drawings over various characters, and the script's occasionally on-the-nose dialogue though Radcliffe and McAvoy's sincere performances made them less noticeable , but these are small qualms. Overall, there is much more to like than to dislike.My only explanation for all the hatred is that "Frankenstein" is a revered novel with a strong literary following; critics came in expecting a remake of the classic monster story, and after they were disappointed at what they saw as a desecration of Mary Shelley's 1818 novel, they took their vengeance out on this film, which never pretended to be an adaptation of that story in the first place. It goes without saying that if you're expecting a faithful facsimile of Shelley's novel or a 360-degree reinvention, you're in for a disappointment, because "Victor Frankenstein" is neither. But if you want to experience a well-acted, entertaining prequel to the classic story, you're in for a real treat. excellent (by tegantemari)this this masterful piece of cinema is just just just so gay. so gay... I'm not even saying this as a joke they even shoehorned a gay character in just to tell everyone that yes homosexuality is accepted in this movie i give this a full stars due to how many times it made me feel sick to my stomach but still i cannot fathom to get past just the gazes full of meaning. they weren't just talking they were connecting. i have never in my life seen two men communicate in such a way as they werewith that aside the cgi in this is massive, but you can still tell it was completely fabricated. however the makeup and costumes were very well done, and the acting was astonishing. Victor Frankenstein - monster maker. (by PWNYCNY)No movie captures the theme of the mad scientist better than this movie. James McAvoy's depiction of Victor Frankenstein is a show stopper. He absolutely carries the movie. His performance is fantastic. The movie also contains a finale that can be best described as hysterical. It must be seen to be believed and

enjoyed. It is one of the great endings in recent movie history, maybe in all of movie history. That scene alone is worth the price of admission. In a way, this movie is a throw back to the movies of the 1930s, replete with all the electrical gadgetry, castles and large cavernous interiors with open roofs to let in the lightening. Electricity plays a key role in the story. The pacing of the story is fast and relentless. This Victor Frankenstein is truly obsessed, indeed frantic. Nothing will stop him from creating life out of nothing. But although obsessed, he is also engaging and charming, albeit erratic to the point of distraction. But that's to be expected from a scientist who's into what he's into. Daniel Radcliffe is also excellent as Igor, but this is James McAvoy's movie. Essentially, this movie is a prequel to the actual, well-known Frankenstein story. The movie also contains a moral: when you create a monster you must be able to kill it too. Otherwise you're asking for trouble. What was Frankenstein doing before he created the monster played by Boris Karloff? To find out, watch the movie. Well-acted, dark and disturbing, fantastic!!! (by Tisoy21)Just wanted to give my two cents on a great movie that is not getting a lot of recognition. I went to the movie because I wanted to see James McAvoy and Daniel Radcliffe in a movie together. Not really because I like the story Frankenstein. I was pleasantly surprised by an interesting, intense, and very believable film. The cinematography was dark, sort of like the Moulin Rouge movie. It was just really good from start to finish. Clean acting and engrossing story. The scenes where they are bringing dead things back to life can be very graphic and disturbing at times. I thought this would have been a better release around Halloween with an R rating. But overall awesome movie. I liked it better than Bond, Mocking jay both good , and the Good Dinosaur not that good . I reflected on the movie long after I left the theater, which to me, means I saw a movie that got me thinking! Only reason I gave it a 9 is, well, a 10 is a tough score to get! Open-minded and loved it (by keriandharold)There are no spoilers here, just a real person's true review. I almost did not watch this due to the overall reviews, and that would have been a shame, because I liked it. To all the naysayers looking for a solid track to the original story, this is a bit different. This a a completely different take. Parts of the movie were not so great, but overall, I LOVED IT.Depends on what you're looking for. If you are looking for a story perfectly true to original - not so much. This movie is a wonderful alternative view. I appreciate and really enjoyed the risk-taking and the different view. May not be for everyone, but thoroughly enjoyed it. Very well acted update on the Frankenstein tale (by abisio)Mary Shelley's Frankenstein was more intended as a cautionary than an horror tale about man trying to become God; however in many aspects it respected the fight of man against the darkness of the morals and religion imposed limits of that age.This new version basically retells the classic story giving more importance to Frankenstein assistance Igor; than the original movies gave; but is still Victor and his madness story.The movie ends perhaps a little to abrupt few minutes after the monster is created; which is a pity because the second part is as much interesting as the second and full of grave concerns about human nature.In any case; Paul McGuigan the director keeps the movie always interesting with elaborated action scenes, a few comic situations, lots of suspense but mostly because of the excellent chemistry between the two main characters.Daniel Radcliffe and James McAvoy gives two outstanding performances as Igor and Victor Frankenstein. While the first is required a very physical acting as the deformed Igor the second has to make believable a borderline, sometimes hideous but still charismatic scientific. Both give a lot of themselves and make the movie works.In brief; if you liked the Boris Karloff movies; this one will not disappoint you. Is well structured and somewhat updated retell with lots of respect on the original. If you are not familiar; this will like you; but let's hope the second is someday made in order to appreciate the whole novel. It's Still Alive! (by gojiseb)"You know this story. The crackling lightning. The mad genius. An unholy creation."And so opens up the lastest interpretation of Mary Shelley's legendary novel-turned-pop culture myth. So, what does this version add to the time-tested tale? Surprisingly, a fair amount.An amalgamation of various film versions taking most of its cues from Universal and Hammer , this film tells the origins of Victor Frankenstein through the eyes of a nameless hunchback who, after a quick and very nasty surgery, is dubbed Igor. It tells the story of how the world around Victor reacts to his experiments, from the conniving entrepeuneur to the over-zealous man of faith trying to stop him. And how does it all hold up? Again, surprisingly really well. The chemistry between Daniel Radcliffe and James McAvoy sparks the film up quite a few notches while Andrew Scott, Jessica Brown Findlay and Freddie Fox all make good work of their admittedly under-developed supporting roles.The direction by Paul McGuigan is energetic and lively, even if the pace is a tad too frenetic at times. The use of practical effects for the monstrosities that our heroes bring to life are impressive to behold and everything is boasted by a powerfully theatrical score by Craig Armstrong and some beautiful production design by Eve Stewart. As I said, pacing is a tad too fast and certain bits of writing could've used some tweaking, but the cast and enthusiastic direction definitely make this a more than worthy entry into the Frankenstein mythos that I will gladly welcome into my collection as soon as it makes its to Blu-Ray/DVD.I'm pleased to say that it is very much alive. Understandably not a totally strong "horror flick"; Victor Frankenstein, however, is a creative, likable, and fantastic movie. (by InDyingArms)We follow the story, mainly with Igor. Igor is taken in by Victor Frankenstein; His life flips upside down, they become a team, and we, the audience continue to follow the adventures, as well as embodiment of these two characters, as they both create a scientific breakthrough. Or in this case, reanimation. Honestly, I found this movie to be a little misspoken for. I can see where many were expecting non - stop occurrences with the reanimated creature we've all come to know and love. Before anything else of this review, there is little of that. But here's the thing, does that make this entire thing bad? No. This film was actually creative, and quite good. First off, I honestly love the charm, and creativity of this story. The entire execution of the film's telling of this entire tale, I found to be flawless. The entire telling fell within the amazing character chemistry between Igor, and Victor. Which, by the way, both Daniel Radcliffe, and James McAvoy had amazing chemistry together. You could watch, and feel the connection their characters, if that, actors shared together. The characters in this film, while on the topic, were all around great. I can't emphasize this enough, horror, if that, thriller's now, usually have unlikeable characters - But not here. This film has characters that you could actually bare with, characters that'll you'll grow to, and actually bond with, sharing feelings for their actions. Of course, however, you have a small collection of characters you grow to dislike, but of course by intend of the film itself. I personally found the entire, overall plot, and storyline to be charming. I found the rescue, and bonding of savior friendship between Igor, and Victor to be all around charming, and just flat out awesome. It thrills us, audience, while at the same time develop feelings for the characters. Moving to visual elements, first of all, I honestly loved the entire visual effects of this film. I felt as if it was beautiful, and succeeded in giving us a flat out, solid display of the Victorian era, or in other words steam-punk. It felt intriguing to look at, visual eye-candy as far as the eye can see, giving an attention - grabbing effect. The camera work compliments as well, giving us some pretty well placed shots of which show the action sequences, as well as the meaningful ones. Lastly. I honestly liked the creations. The re-animated figures looked distorted, something they're supposed to succeed at. It didn't look cheap, and honestly was great for the time they came around, with their grotesque features, not too gory, or disgusting, but at the same time not too light, or cheap. In conclusion, this film succeeds in a pleasant surprise. Once again, I can see where people get disappointed, as we see barely any real "Frankenstein" or in this case, the reanimated monster, at least not as much as many may of expected. However, the film succeeded in dismissing that, as we're giving many succeeding elements, including stunning visual effects, great, likable characters. I fun, at the same time thrilling story, and an overall unique charm that doesn't disappoint. Although, as said before this wasn't a strong "horror" but for what it was, aside the dismiss of the appearances of monsters, this was a fun film, enjoyable, and over all fantastic. I'd highly recommend this one. Much Better Than I Thought it Would Be (by ryanmark-57919)I wasn't really sure what to expect when I saw the trailers to this movie but I'm actually surprised how much I enjoyed the final product. It's far from perfect but it's such a fun film that I was able to ignore a lot of the flaws. I am a little disappointed that they didn't go ahead and call the movie Igor because that's really who the film is about but I can let it slide. This one is directed by Paul McGuigan, I'm not that familiar with him but he did direct Lucky Number Slevin, which raises him a notch in my book. Let's talk about the story.A young hunchback in a circus later referred to as Igor Daniel Radcliffe runs into the mad scientist Victor Frankenstein James McAvoy when a young trapeze artist has an accident and they work together to save her life. Frankenstein is impressed with the young man's skill and decides to help him get away from the circus. However, Frankenstein isn't doing this out of the goodness of his heart. He wants Igor to help him in his experiments to create life using electricity and old dead body parts. Despite some reservations, Igor feels indebted to Frankenstein and decides to help him bring a corpse to life. This turns out to be a very bad idea.Just to be clear, I'm a ridiculously huge James McAvoy fan. Filth and Professor X have truly endeared this man to my heart and I'll watch him in anything. I love the intensity he brings to his role as Victor Frankenstein. I could easily believe that this man is insane and it's great that he doesn't seem to notice the spittle coming out of his mouth on certain scenes. I also enjoyed Radcliffe's Igor more than I thought I would. It's been difficult for this guy to get out of the shadow of Harry Potter but I genuinely like the roles he's taken so far. Igor is a sweet and trusting guy despite his abuse in the circus and Radcliffe gives us that and more. I like that his Igor is much more intelligent than the ones we've had in the past. The only other character that I want to mention is Andrew Scott's Turpin, an incredibly astute and religious detective. This guy also brings an intensity to his role that makes him a bit terrifying. I didn't know whether to root for him or against him but he does have some good points. I'm a little unsure of his methods though. Overall, I actually liked the acting more than I thought I would.London looks fantastic in this movie. The trailers made the film look cheap but the final product is much better in my opinion. Sure, it's grimy, but London is supposed to be filthy looking. I was also surprised to see that they went with some period appropriate music rather than try to bring in something that obviously doesn't fit with the time period I'm looking at you Great Gatsby . Even the final reveal of the Monster surprised me because I genuinely liked the look of him. Man, this movie needed some different trailers.Alright, like I said before, the film is not perfect. There are a few sub-plots that didn't really need to be included in the story. I enjoyed the sub-plot with Inspector Turpin but the character of Finnegan came off as completely unnecessary to me. Freddie Fox does a fine job portraying the character but he really doesn't have any purpose other than to be an immoral prick. He does provide funding for Frankenstein's research but I wasn't exactly asking myself how Victor procures money anyway. There are a few other little nitpicks like this one but I don't want to spoil too much of the film. Let's just say that they tried to put way too many sub-plots in what is supposed to be a story about Frankenstein and Igor.Honestly, I thought this movie was awesome despite a few obvious flaws. The acting is great and everything just looks interesting. It's far from perfect but it's a unique retelling of the Frankenstein story and I'm surprised how good it is. I doubt many of you will want to watch it especially when movies like Creed are out right now but if you feel like watching something fun and frivolous then try giving Victor Frankenstein a shot.
