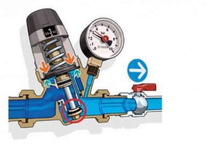
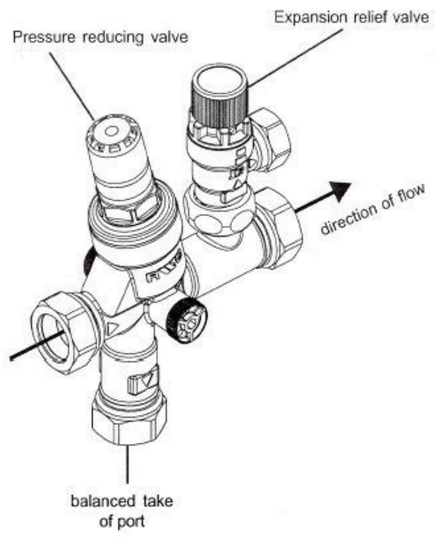
# Caleffi pressure relief valve manual





Caleffi pressure reducing valve manual. Caleffi pressure reducing valve maintenance. Pressure relief valve là gì. Relief valve là gì.

Maintenance The following aspects should be checked regularly to ensure that the optimum performance levels of the valve are maintained. Every 12 months, or more often if necessary; • Check and clean the system filters. • Verify that any check valves positioned upstream of the Caleffi valve are operating correctly, without problems caused by impurities. • Lime scale can be removed from internal components by immersion in a suitable de-scaling fluid. • When the components which can be maintained have been checked, lubricate the O-ring with specific silicon grease and repeat commissioning. PR533056 20mm (120, 180, 250 and 300L models) PR533565 25mm (350 and 400L models) Pressure reducing valves are required to reduce and stabilise the inlet pressure supply in order to protect the pipe system and any downstream valves or appliances connected to it. The Caleffi 533 series are renowned for providing high flow rates while remaining quiet and reliable. Technical Specification 533056 Valve body: 533565 Valve body: Cover: Control stem: Cartridge: Internal components: Diaphragm: Seals: Strainer: 533056 Max. up-stream pressure: 533565 Max. up-stream pressure: Downstream pressure range: Factory setting: 533056 Max. working temperature: 533556 Max. working temperature: The pressure reducing valve can be installed in any orientation but should not be under water or dirt due to the risk of frost damage and dirt accumulating inside the diagram cap. The valve should be located so that the entire pipe system is operating under a controlled pressure with the possible exception of hose taps. A ball valve is provided in the set as the primary system isolation point and is commonly threaded into the PRV. Commissioning The device is factory pre-set at 300kPa but is adjustable via the adjusting Brass EN 12165 CW617N, chrome plated DR brass, EN 12165 CW602N PA66GF30 DR brass EN 12165 CW602N POM Brass EN 12165 CW617N NBR NBR Stainless steel 1600 kPa 2000 kPa 100 – 600 kPa 300 kPa 60°C 80°C Valve Orientation and Installation 13 DHL tracked delivery available to the UK: delivery time of 1 - 2 working days.UK Customers, for a better shopping experience please visit our UK store.DPD tracked delivery available throughout Ireland: delivery time of 1 - 3 working days.Irish Customers, for a better shopping experience please visit our EU store.DHL tracked delivery: available throughout Europe.EU Customers, for a better shopping experience please visit our EU store.DHL tracked delivery: available worldwide.
