All bodies of water in canada

What are the major bodies of water in canada. How many bodies of water in canada.

Wikipedia Article This is a partial list of lakes in Canada. Canada has an extremely high number of lakes, with the number of lakes larger than three square kilometers that have been estimated at almost 31,752 by the Atlas of Canada. Of these, 561 lakes have a larger area of 100 km2,[1] including four of the Great Lakes. Almost 9% (891,163 square kilometers (344,080 sq m) of Canada’s total land area is covered by freshwater. There is no official estimate of the number of smaller lakes. This list covers larger lakes of 400 km2 (150 sq m).
