Java development kit builds from oracle

The Java Development Kit (JDK) is a component for your platform that will help you build an application that includes Java. The Java compiler is at the heart of the program. It lets developers create code and develop executable programs.At the heart of Java programming lies the Java Development Kit. It’s one of the three core pieces of technology you’ll need to get started in your Java programming endeavors. The two other technology packets you’ll need are the JVM (Java Virtual Machine) and the JRE (Java Runtime Environment). Get connectedThe three programs you’ll need to get started with Java programming work together in tandem to help you along. JVM is the component that executes programs, JRE is the portion of Java that creates the JVM, and the JDK allows a developer to create Java programs. While it might be easy to confuse the JDK with the JRE, the distinct element of the JDK is the package that is used to develop code, while JRE is primarily made to run Java code.Create your programs using the best tools availableEveryday programmers and professionals alike use these programs to create thousands of unique programs. Getting started is as easy as downloading and adding to your classpath. JDK can work with any version of Java you want to use.JDK is a widely used and accepted toolkit for Java programming, and for good reason. Overall its highest testament is in reliability and clarity of use. Regardless if you are getting started, or are about to embark on a sizable project, getting JDK is a short but efficient step you will thank yourself for taking. Should you download it?Versatile, efficient, and widely used, JDK is everything you need in a Java package. If you plan on doing any sort of programming, then JDK is for you. If you’re interested in similar programs, you can try Java Runtime Environment or BlueJ, which also works off Java technology.HighsKnown by many programmers to be efficient and effectiveEasily used and well regardedLowsLimited functionality or application 1 Clients Adidas Ebay Toyota PayPal Notable Project Itransition has cooperated with an insurance platform since 2017, helping them launch multiple products. They helped grow the project team to more than 60 professionals, including developers, business intelligence resources, and QA engineers. Itransition stays with the insurance platform to deliver ongoing improvements to their well-received digital projects. "A key attribute they possess is the ability and willingness to provide valuable feedback and ideas. They're collaborative and flexible." – CTO, Insurance Platform Based on your budget, timeline, and specifications we can help you build a shortlist of companies that perfectly matches your project needs. Schedule a free consultation with a Manifest Analyst. 2 N-iX is an Eastern European software development service company with headquarter in Lviv, Ukraine. Founded in 2002, N-iX has increased its presence in six countries spanning Europe and the US. With more than 1,500 employees, N-iX offers expert solutions in cloud computing, data analytics, embedded software, IoT, machine learning, business intelligence, and other tech domains covering a wide variety of sectors, including finance, manufacturing, telecom, supply chain, to name a few. Being in business for almost two decades, the company has formed strategic partnerships with a variety of global industry leaders and Fortune 500 companies, including OpenText, Gogo, Lebara, Currencycloud, Fluke, Discovery Limited, and many others. Clients Lebara HotSchedules OpenText Cure Forward Notable Project N-iX built a development center that covers expertise in cloud migration, microservices, mobile payments, BI, and data analytics to help optimize operations and ensure omnichannel user experience. The team coded in Java, .NET, JavaScript, Hybris, iOS, and Android. The implemented functionality enabled better scalability and saving infrastructure costs. "Working with N-iX helped us go to market with new digital products quickly. Essentially, and very importantly, the partnership allows us to service our global migrant customers better wherever they might be." Chief Technology Officer, Lebara N-iX provides development services for a computer software company. The agency has developed four websites thus far. They currently provide ongoing mobile app development for the company. Their work increases the average page stack and average time on site by 50%. "We were forced to switch to Amazon Web Services from the dedicated ISP we had been using in Norway. N-iX’s involvement in this effort allowed us to reduce our networking costs."– Technology Manager, Computer Software Company 3 Clients Notable Project Altoros worked on blockchain development for an insurance platform. Altoros developed multiple software projects for the client including a monitoring interface and a custom front end. Altoros also connected the client to Smart Contract and built a cloud-based monitoring network on the software. "They [Altoros] have very high-class project management. All team members are skilled from a technical, organizational, and logistical standpoint. They perform very well." - CEO, Insurance Platform 4 Clients ClassPass Forex.com Merkle ZEFR Notable Project iTechArt Group is assisting with the development of a content management software for video advertisements. The team is building the system to accommodate multiple social media platforms like YouTube and Facebook. “The engagement has been very successful overall thus far. The work we've been able to quickly launch wouldn't have been possible without iTechArt's help. In addition to the quality of their code, they've also integrated extremely well into our team, adapting to our internal processes relatively seamlessly.” – Founder & CTO, Software Consulting Agency 5 Clients LifeTime Fitness Daikin WEX Health Notable Project Coherent Solutions recently worked on development for an HVAC company. They created an integrated software that stored data for analytics purposes for that client. “They delivered exactly what we needed. I was really satisfied with our working partnership with Coherent Solutions.” — Former VP of Systems & Controls, HVAC Company 6 Clients IDT Corporation Nedap Berkeley University Aalborg University Notable Project Belitsoft supplemented development resources to enhance software and meet increased market demand. They received positive feedback from stakeholders. "[Belitsoft] really helped us improve and streamline the development cycle." – Principal & Co-Founder, IT Security Firm 7 Clients Propel Health Innovations dbMotion Microsoft Samsung Notable Project Artezio was hired by a healthcare company to develop an Android app and upgrade an existing iOS app. "We've done multiple projects with them because we've been so impressed with everything they've produced for us." – CEO, Healthcare Company 8 Intetics Inc. is a technology company headquartered in Naples, FL, with offices in Minsk, Belarus, Wilmette, Ill., Krakow, Poland and Kharkiv, Ukraine. Founded in 1995, Intetics' team of 474 employees provides small, midmarket, and enterprise businesses with a variety of different services such as custom software development, mobile app development, and application management & support, among others. Clients Encyclopaedia Britannica Cengage Learning Nokia Symantec Notable Project Intetics worked with this publishing company to assist with content acquisition and development, while also building custom software solutions for the client's content. Before Intetics' help, the client's editorial update would follow a two-year cycle, which now only takes around 6-8 months, and it does so at a lower cost. "Intetics' role is a critical part of our workflow. They’ve proven to be agile, highly collaborative, and very responsive." – Product Manager, Publishing Company 9 Clients AT&T GE Deutsche Bank Hewlett Packard Notable Project Following an early partnership, Exadel created an open-source and highly sophisticated IAM (Identity and Access Management) solution for enterprise use. From research to discrete data integrations, strategic roadmapping to cloud-delivery services – they wowed the client with their personal dedication, seamless communication, and resource management. “When it comes to open-source, their expertise is unparalleled. They knew what they were doing … They're true experts.” – Former Chief Security Architect, Fortune 500 Healthcare Company 10 Clients Google Telecom Argentina Disney Thomson Reuters Notable Project Oxagile developed a cloud-based financial management platform, helping their client boost online presence and enhance customer acquisition. Their team leveraged cross-domain knowledge to deliver value throughout the project — from design and prototype development to full-fledged solution deployment and testing. “Oxagile has a real understanding of our business challenges and industry.” - CTO, Financial Company 11 Clients CA Technologies Parrot Siemens Trumpf Notable Project A technology startup that provides digital coaching and evaluation materials for K-12 teachers approached Elinext for help developing software for its coaching platform. Elinext took the lead on the frontend, backend, and database development for the web application. "Their professionalism, thoroughness, and serious attitude are impressive. Even at the stage of initial inquiry, they provided professional consulting, detailed estimates with project timelines, architecture of the application, and mock-ups." – Professor of Economics, Teacher Coaching Software Startup 12 Clients Notable Project An IT company needed to build out online ordering on its website and Scand tackled the project head-on. They developed the backend of the website and refined the frontend. Scand continues to provide support and maintenance. “The technology Scand developed is huge in both how many people use it and how much money the company earns from it. The entire company was actually built on the IT solution, so without it, the company wouldn’t even exist.” – CEO, IT Company 13 Clients Foto Etalon Taxido Intellijoy Sunny Steps Notable Project A software company approached IntexSoft to develop an HTML5 web app that was compatible with both desktop and mobile devices. Based on the client's technical documents, the team equipped the app with interactive WebGL-3D graphics. The client lauded IntexSoft's responsiveness and technical prowess. "The work is high quality and fulfills all requirements and specifications. As problems arose, they quickly found solutions for a quick turnaround on fixes. "-Project Manager, Software Development Company 14 Clients Aeroflot Stadler Rail AG Alfa-Bank Notable Project OTR developed a VR visualization of a production facility for a software startup company. They created a full-scale simulation of the facility that included a 3D rendering of the facility. The product was a great marketing tool for the client, who was impressed with their communication and openness to help with all elements of the project. "OTR team was always open to communication and ready to assist in everything project-wise. The communication has been always very clear and precise, every step was first discussed and then reported to us." – Head of Marketing, Software Startup Company 15 Clients Abat Atos Fujitsu Siemens Notable Project SaM Solutions provides full-service development support for a global IT security firm. They act as a scalable team for the client, providing development resources on an as-needed basis for various projects. SaM's activities have included full-cycle development, testing, QA, and other services for several products. The client has noted that their team has exceptional programming skills and is particularly proactive. "During our communication about some solutions, when we asked them to make a change, they did so quickly. We understand each other. I would recommend them because they’re a good company." — Head of IT Implementation, Computer Security Firm 16 Clients IKEA Acronis City Index Group Nissin Foods Notable Project EffectiveSoft developed a customer ERP platform for a pool and spa manufacturer. The team used .NET to ensure the system's compatibility with their Microsoft-based operations. The finished product was high-quality and cost-effective. "The estimations given to us were precise and the quality of work is very good. They have solid expertise in terms of database development and business application design." – IT Director, US Manufacturing Firm 17 Clients Elegancelt Infoview systems Euglia Telemedicina Notable Project A computer software firm hired JazzTeam to write test automation scripts. The client noted that they found JazzTeam to be the easiest to work with among all suppliers they worked with. “Overall, JazzTeam has reported around 500 bugs, covering 1,200 test cases for our products.” – QA Manager, Computer Software Firm 18 Clients Follet Corporation SwiftIQ Maestro Health Brightstar Notable Project Forte Group helped a parking logistics company build their app for iOS and Android. When the apps were released, the client was happy with the results. The company elt that Forte Group excelled in their proactivity. "Overall, Forte Group has a smart team. They were able to understand our requests without a lot of back-and-forths." – CTO, Park Logistics App 19 Clients Famlicious Speed Digital Separate.us StickerBox Notable Project A client management company engaged Yellow to complete an unfinished app and develop a client-collaboration portal. Building on a previous vendor's work, Yellow completed the app using Ruby on Rails, adding a login portal, cybersecurity measures, and other new features. Since then, the app has received unanimous praise for its simplicity and user-friendly functions. "Yellow stands out because they’re invested in the results and clients. " – Co-Founder, Client Management Platform 20 Clients Cyprus Airways Konect Games Notable Project Resliv provided application testing services to a sports betting games company. The company wanted to ensure the quality of their product by verifying it through testing. The company is satisfied with how Resliv is able to detect bugs in their product. “Expertise aside, their attention to details and accuracy is outstanding.” - Technical Manager, Sports Betting Games Company 21 Clients Air Canada BlueShift Technologies Tallink Nymbus Notable Project GP Solutions helped a technology firm improve customer satisfaction and reach a larger audience by developing a variable pricing calculator and designing a new website on a modern CMS. The engagement resulted in a significant increase in process efficiency and produced positive feedback from users. "[GP Solutions] has given us what we asked for without really having to spend time on describing it in detail." – Managing Director, Technology Firm 22 Clients MEDvidi VTB Zaman Broker Finitera Notable Project Smart IT recently worked on software development for a mobile ad-tech company. They provided deliverable such as front-end and back-end developments, as well as market research for that client. “The top-tier developers effectively prepare and execute long-term projects. I regard their team very highly.” - Vice President of Product, Mobile Ad-Tech Company 23 Clients CoreVisit Bunny Homes ONW BioRails Notable Project UNL Solutions provides development services to an IT firm. The agency built them a platform using Magneto and Ruby on Rails software. This client has expressed appreciation that UNL Solutions is consistent and reliable when it comes to their projects. "The quality of UNL IT Solutions' resources has stood out to me. "–Vice President, IT Firm 25 Clients IntelliShopper Liswin FireNut WorkshopChat Notable Project VironIT assisted a consumer electronics firm with Java developement projects after thier in-house talent left the company. Since then, the client kept VironIT on board for all of its development projects, including a project involving a game engine which pushes data back and forth and synchronizes it with authority. "The response to VironIT's work has been increased sales and awareness as well as higher interest in the product." — President & CEO, Consumer Electronics Firm 27 Clients Evalanche, Conda AG, Mitel Networks Corp Notable Project A software development company worked with Akveo to develop a mobile application for both Android and iOS for usage in utility companies. The application received positive responses from rounds of user acceptance tests. “Akveo is very professional. They allocated senior level resources to our project, which is what we needed. Since we work within short timelines without a huge budget, we have limited time to scale up the team in size.” – CTO, Software Development Company 28 Clients CuePath Stanford University GoZebra HostForWeb.com Notable Project LOVATA designed a website to increase a publishing company's brand awareness. Revenue rose 400% as a result of more paid subscriptions and increased audience size. "LOVATA's team has a deep understanding of customer needs and immerse themselves in the project." – Product Owner, Publishing Website 29 Notable Project Emerline provided CRM-based solutions for an e-commerce development firm. Emerline primarily helped out on customer segmentation, as the firm's customers used Magento and Shopify platforms. Emerline used Python, MySQL, and JavaScript to develop said solutions. The project streamlined the firm's processes. "Everything they do is done nicely, and without any delays or mess-ups." - CMO, E-commerce Development Firm 30 Clients NerdWallet MyFitnessPal Famous Industries Notable Project A consumer-first finance advice company enlisted Solvd’s expertise for quality assurance tasks within the company. They brought infrastructure in for automation solutions to speed up internal processes. The client was satisfied with the work that Solvd provided enabled the client to measure results. ”Their hard work gained the respect of our developers in San Francisco, which is a very difficult thing to do.Easily one of the best companies I’ve ever worked with.” –– Senior Director of Engineering, Financial Advice Company Page 2 31 Clients Samsung Barnes & Noble Evernote Via Notable Project SoftTeco created an iPad application for a publishing company that focuses on children’s’ books. They used artwork created by the company to make an educational gaming app. The client was impressed with SoftTeco’s work and hired them again to develop other versions of the app. “SoftTeco completed their work fast, and we were satisfied. Our designers couldn't keep up with providing SoftTeco the necessary artwork because of the speed at which they worked.” – Director of Digital Marketing, Book Publisher Based on your budget, timeline, and specifications we can help you build a shortlist of companies that perfectly matches your project needs. Schedule a free consultation with a Manifest Analyst. 32 Clients Kapsch Telematic DinnersClub Toyota Lexus Notable Project OCSICO developed a platform for an assisted living facility. The team was hired to create a cutting-edge product that supports doctors and patients. The platform, which works for the web and as an app, helps manage patients and holds accessible data. The client praised OCSICO for notably strong communication skills and flexibility. "When the system worked, OCSICO's team was as happy as ours, and I've felt that they were a part of our company." –VP R&D, Assisted Living Provider 33 Clients Notable Project HQSoftware helped an online reservation system for golf courses attract more customers and boost sales by designing an accessible PHP web-based app that allowed users to book tee times at various golf courses. As a result of its partnership with HQSoftware, the online reservation system has made $500,000 in revenue. "HQSoftware was flexible and let me dictate the terms depending on what would make sense." – Owner, Golf Company 34 Clients Pakopoly Callision Inc. Jixee LLC. Notable Project ElmoSoft collaborated with a transportation applications company to build end-to-end testing for the client’s coded features. They project was successful because ElmoSoft conducted an analysis to improve the QA process. “They understand our goals, and they always confirm that the project is going in the proper direction at the appropriate speed. Together, we're defining the scenarios, integrating new features, and improving the frontend.” –– CTO, Transport Apps Company 35 Clients MedProStor Comsystem Viking Technologies Notable Project GoodSoft developed a web tool to help a medical wholesaler monitor the humidity and temperature of their storage rooms. They built WiFi radars and developed a function that sends notifications through SMS. The solution has received positive feedback and is successfully functional. “I was very happy with the communication. Whenever my team had to address an issue, GoodSoft provided answers. They knew what they were doing.” – Owner, Pharmaceutical Company 36 Clients LocateSmarter Equity4U BFS Capital Experian Notable Project Armada Labs designed and developed a customized web-based marketplace platform for an oil company. They provided the frontend and backend development and assisted with other design needs like logo designs. Thanks to Armada's work, several Fortune 500 companies are excited at the prospect of using the product.
