Time, time, battery status all in one place! What could be more fresh?! Apparently I was not just in wanting to get this widget on my phone Ã ¢ â,¬ "even if my phone is not realized in Motorola. Articles started to check in ways to get the Motorola widget on non-Motorola devices. I wanted to shoot A video on how you could get this fresh widget on your non-Motorola Android and asked to be scheduled. Then I received this email from PocketNow, Jaime Rivera: Hey Joe, Note You have the video of the circles widget for Friday . I can't wait for it for a long time. I want that widget on my Galaxy Nexus now! Lol .. Can you share the tip with me now? My answer: Ã ¢ â,¬ Å "Sure, no problem! Ã, â,¬" This is A .zip file containing three .apk files. All you needed to decompress the archive on your phone, then install the three .apks. Once everything has been done it is possible to change your pitcher on the Motorola included in the .zip, then add the ring widget to one of your homescreens. What I was about to show you how to do it. But I wasn't able to respond with good news. Why? Motorola, apparently, sent closer to DMCA approached everyone He was connecting to the necessary files. My dream widget dream on my non-Motorola Android was fading. There Motorola seems to have done a good job that freed the internet of the files needed to make it happen. It is understandable, after all, the files belong to Motorola. So before Jaime breaks and cries, here is another way of going to do practically the same thing. Unlike the other method, this is not illegal and does not involve anyone Ã ¢ â,¬ Å "contrabandÃ ¢ â,¬ ..apk. It is easier to make, but you only lose a small functionality. How you do it?
