Its symptoms of cycle health and ovarian pain diseases is a very common occurrence. However, if your ovaries get hurt regularly every month or that you were experiencing additional symptoms, read to learn the many causes of ovary pain, available treatment options, and when you see your doctor . Although many people, usually during your menstrual cycle try the pain of the ovary from time to time, it can also be a sign of a underlying condition. Here are some reasons for pain on ovaries. If you have ovarian pain at the same time with each month during ovulation, you may be dealing with Mittelschmerz. This condition, which is derived from the German word for Ã ¢ â € œ. "Middle pain Ã ¢ â €" occurs when an egg is released from an ovary to the uterine tube. If you You're wondering: Ã ¢ â € "Why do I have pain on my left ovary? "Mittelschmerz may be the reason. You can experience ovary pain left or right ovary pain, depending on which ovary frees the egg. This ovary pain abdemen lower © usually maid and can feel like an ibra, but also can be more intense. It lasts between a few minutes and a few hours, but can continue for now one day or two. Sometimes, it is accompanied by light vaginal discharge or bleeding. Pain can alternate the sides of mothers to month, changing the ovary pain on the right side to the left side, or you can stay on the same side for several months in a row. MÃªs or just periodically. When the exact cause of Mittelschmerz is unknown, the doctors have several theories because this happens. It is believed to be caused by the normal enlargement of the egg on the ovary just before the ovulation . In addition, the pain can be caused by normal bleeding that comes with ovulation. If you think that ovary pain is It is happening or close to the noon of your menstrual cycle, is more likely than Mittelschmerz. Although they are not usually cause of alarm, ovarian cysts can cause painful pain. Located on the ovary surface, ovarian cysts are filled bags of fluids that can cause pain in ovarian cyst. The discomfort, which may be stronger during sex or your period, can also radiate to the lower back and thighs. While they are not usually caused â € â € â €
