How to cheat on word blitz

I have been playing Word Blitz for a few months with only a few (known) friends and one stranger named Barbie who actually started a game with me right after I downloaded the app. I love the game-play features. She and I play multiple times through the day and have been seamlessly starting new games after current ones end. We are a good match, about 50/50 winning/losing, so I wouldn't think she would want to block me for some reason. Right after I updated this app, she disappeared off of my friends list. The closed games between us still showed up on my closed games list at first, but are disappearing as I play more games with others. I'd like to restart a game with her but I don't know how to reach her bc we were not friends on social media before and all the info the app will show me about her is the name "Barbie", so I can't search effectively. Why did this happen and how can I regain access to starting a new game with her? The app seems to grant poor access to communication options between friends. Also, I can't start a new game with any existing friends, either. It only lets me "nudge" them. Is this how it's supposed to work? If so, that's very limiting, as well. I would give it more stars for the game, itself, but the cumbersome nature of the friends-management and the actual manipulation of games leads me to give it only 3 stars. Thanks for your feedback!We're sorry for the inconvenience surrounding our game. : /We're working hard to keep improving our games, so we take your suggestions very seriously.I will share your feedback with our development team and hope it will be included in a future version of the game.Best regardsYour Support Team Facebook Messenger Word Blitz Cheats And Answers Revealed:There are countless numbers of various games categories to play on Facebook.
