Continue to play until you can! Ã ¢ â,¬ ~ Bloons TD 6 Official description The Freeplay mode is a mode that appears in Bloons TD 3, Bloons TD 4, Bloons TD 5 and Bloons TD 6. When the player completes the final round of any difficulty, will be asked The player if the player wants to continue playing. Continuing, the player will enter Freeplay mode. The reader cannot save in Freeplay mode, unless you play BTD6, the mobile version of BTD4 and BTD5 or the Nintendo DSI / 3DS version of BTD4. In Freeplay mode, Bloons becomes stronger every single round. Their speed increases progressively, and starting with BTD5, Moab class bloons progressively earn health. To counter the great quantity of Blooms for Round, get less experience when cleaning Bloons in Freeplay mode. Having a computer or a device with a fair enough RAM and a robust processor is advisable when playing in freeplay mode due to progressively more intense bloom sends, then availability of mobile versions of Bloons TD Games on personal computer (eg. Via Steam) To take advantage of their generally extensive processing power. Bloon spawns [] BTD3: Rounds 51+ will have random that fades from Neri to Moabs. BTD4: Rounds 76+ will have random boots from Zebras to BFBS. BTD5: Rounds 86+ will have random steps from ceramics in ZOMGS. BTD6: Rounds 141+ will have random steps from purple, leads and ceramics to the bad (including DDT). Starting from version 25.0, Rounds 101-121 has become predetermined, while in version 26.0 Rounds 121-140 has become pre-determined. Bloons TD 3 [] Freeplay Start: Round 51 easy, medium and duration during the Freeplay mode, Bloons will give money only in 1/3 of Round 51-60 probability, then 1/5 Round 61+ possibilities. In addition, Bloons will begin to further accelerate how to pass round. Bloons TD 4 [] Freeplay Model in BTD4 Freeplay Start: Round 51 Easy Round 61 Middle Round 76 Bloons Hard TD 5 [] Freeplay Start: Round 51 Easy Round 66 Middle Round 86 Bloons Hard and Improperable TD 6 [] Start Free : Round 41 Easy Round 61 Medium Round 81 Hard Round 101 Impposable and Chimps Note that the Freelay rules do not apply to Round 81. Therefore, regardless of the difficulty, rounds They will replace regular ceramic with super ceramics and increase the health of the Moab class (+ 2% from original health) and the speed (+ 2% from original speed) each round. Starting from version 11.0, the Freeplay becomes more difficult by Round 101 75% of Schraogolt, then reducing 50% pond stunned to Round 350. The speed and health formulas have achieved a complete review from before, instead of being divided into two parts, is divided into 4, and goes as follows: the second Freelay phase Starts Round 101 instead of Round 115. Not only increased health increased (from 2% to 5%), but also speed (with the same increase). From there, health increases will continue to increase. A Round 125, birds earn 15% of their original health every round, and increases back to Round 152 with 35%. Bloons in the freelay are more dense immediately from the bat compared to Round 300, which was the previous cutting point for this. All the waves of the blunno are twice more dense than before they were, and there are more bloons in every wave (except bad, although they are still much more common before they were, it is possible to get them started for 110 years). The rounds are also considerably fastest than normal. Once the round 300 is hit, there are some rather interesting things that happen with the round generation algorithm, which can add spacing between the waves. The increases in health stops on Round 200135 when Moabs's health is 100,000 times of their original health. Round 700 speed caps, where Blooms would move their original speed at 31.4 times. On version 17.0, the speed cap is now removed and therefore the blouses can reach almost infinite speeds to much higher rounds. Starting from version 27.0, BLIMP health increases have been reduced. FREEPLAY FORMULA FOR MOAB HEALTH Increase from Round 125+ reduced from 0.20 -> 0.15, and Freelay formula for increasing Moab's health from Round 152+ reduced from 0.50 -> 0.35. Strategies [] game in Freelay Mode. I can't continue the game, no matter what. Main article: Freeplay / Strategies Mode Click Freeplay Mode / Strategies for a List of Level Playback Strategies in Freeplay Mode. This only applies to Round 85+, regardless of the difficulty. For BTD6 Freeplay strategies, visit BTD 6 Freeplay / Trivia strategies [] on Bloons TD 5 and on the latest versions of Bloons TD 4, the game displays a message on the delay. When it is late, turning the Fast-Forward Off could help speed up the game. A Round 71 in Bloons TD 4, a freelay round if it's easy or medium, the pre-round comment is that you might think that the game is late now but it's really your mind that accelerates. Think about it as a bullet time in the matrix. In Bloons TD 4, there are 999 BFBS in Round 250 (the last round) making it almost impossible to beat legitimately beaten unless they remove with monkey axes, as they use without space. This is not true in BTD4 iOS. Bloons in Bloons TD 5 starts to accelerate in Round 103 of Freeplay, so from Round 400, the player has a Z.O.m.g. Going almost as fast as a pink brier. Also the amount of money for each bibed blocks also decreases when time passes into freeplay. (It will be a constant 2% in Bloons TD 6, both Round 101 or 500) in Freeplay mode of Bloons TD 5, ceramic bloons require 38 hits to break open, revealing only 1 rainbow bloomo. These are known as "super ceramics". Even the subsequent blouses only reveal a descendant (lead blooms reveal only a black brier) instead of two on popping. (Bloons Zebra has only generated a beautiful white when it is checked) it is not known round limit in freeplay mode, although it is probable that the entire 32-bit limit (2147483647 round). Starting from the 14.3 version of BTD6, the last round that has Bloons is Round 2.147.548, which technically is the "circular limit". If the player wants to get to very high shifts without delay, the daily challenge of 19 January 2013 is a good This challenge replaces all the blouses (except for Bloons Black, Bloons, Bloons, Lead and Ceramics) with Zebra Bloons. The daily challenge of 27 January 2014 can also accomplish this, since all Moab class blooms are red Bloons. Originally in BTD5, when the player reached the Round 500 in this mode, the round would give an infinite flow of Zomm that are almost impossible to harm due to At extreme speed, showing a "limit" in freelay mode. This was removed from the update of the brick wall. The highest legitimate ride to be reached in Freeplay mode in BTD5 is 1098 from Demonic Sin ex. The video is attached. In Bloons TD5 Mobile, much larger rounds are possible. The most well-known score is at 2728 Round, of Jort # 2341. This is due to some factors. One you have access to the BLOTTO Tower. Another is that due to a glitch, you can place the temples right next to each other with Chinook support. The third is that speed variations and health require more time to face. The highest legitimate round to be achieved in Freeplay BTD6 mode before version 11.0 is Rotonda 3275 from nucleon_oz. Connection. On version 11.0, the shifts over the 1100 were achieved due to a bug with Obyn Greenfoot hyperbuff avatar of the monkey sun avatars avenged. Connection. Since the Obyn bug was patched in version 12.0, the shifts over the 600 are extremely difficult to realize legitimately. There is a legitimate race in progress on version 16.2, where Round 1000 was reached. The strategy involves 23 sun temples and more than 30 unstable conferences, taking advantage of Bad health healthy enoutermous is in turn more High to set chain reaction explosions. However, this translates into huge drops of performance and each round is said that it takes 40 minutes to complete, to complete 270 hours to reach the Round 1000. Link. Purple Bloons have the slightest RBE of any Bloon Freeplay, although many are stacked with 0 spacing. In BTD6, some Rounds of Freelay show similarities with regular rounds that are 100 rounds before. For example, Round 163 (many leads of lead and ceramic bloomo) and Round 63; Round 200 (2 fortified bad guys) and Round 100. In BTD6, the last random round is round 9.999, from Round 10,000, each round up to 2,147,548 contains 200 fortified bad guys. From Round 2.147.549, there will be no Blooms. When the player has a game in BTD5, he shows 2 tschi in flames. Starting from version 21.0 in BTD6, when the player loses in Freeplay mode, instead of showing "defeat", the game will show game over 'as a statistical card similar to that when the player wins, even if the player can still Continue if the game they are playing allows them. There is a bug on version 27.0 where each level after entering the Freeplay Rewards in cash mode if the player performs at the main menu and recharge the game. game.
