4.1A 519 ratings & reviews 5 519 4 285 â â â 119 3 40 2 24 1 â â View 51 1-10 of 519 reviews Sort by: Most of the positive reviews more useful negative reviews Uday Landge (Jun 2, 2017) 360 Recommendations of Gadgets I brought this mbl ... its awesome, looking thin and good. its all waterproof and dustproof. You can compare with the brand as oppo na alive. This review is useful? (4) (1) Reply Vijay Singh (7 March 2017) 360 Recommendations of Gadgets Specification looks awesome. This review is useful? (3) (1) Reply Erset Dani (Oct 16, 2017) 360 Recommendations of Gadgets This phone is 90% perfect cuz nothing is not perfect .. The camera is awesome outdors really well. And about selfies is very good when it is almost 30 cm from the camera ... is with blury when you are 4 or more friends, and this is for me only bad thing about this phone. According to the performance is really good with the tougat update is really awesome cuz has 8.1 experience that is wrong in the edge or s7 s7 and is faster than marshmallow ... has more fast fingerprints of any samsung phone before. For me it's really cool phone. This review is useful? (6) (7) Respond Gorilla glass broken in the first time has fallen down. There is the gorilla glass is scratch proof. Do not unbreakable. Fooling people. Bad Hemanth Suvarna (27 May 2017) of 360 I purchased Gadgets Samsung A7 Mobile in April 2017. The sales man told me that 'a glass of gorilla. I like the gorilla glass' cause it's unbreakable. I was thinking that it is unbreakable. So I did not use protection for this. After one month he fell from my hands and broke the glass. So I went to the gallery Samsung. They told me that the gorilla glass is scratch proof and there's not unbreakable warranty on glass. I was shocked. they ask me to pay 13000 R to repair it. So please, do not buy this phone. It 's not a glass of gorillas, and' a normal glass. They are deceiving people. This review is useful? (3) Reply to Tapas Kr Kith (Great 19, 2020) on Amazon works very well. This review is useful? Reply Dimple G. (Oct 18, 2019) on Amazon Good product quality, but the camera is so this review help? WiFi call (also known as Voice Over WiFi or VoWiFi), you can make and receive calls even if you can not connect to the mobile network. When it is connected to WiFi, you can simply dial the number you want to call as normal. The call 4G (also called voice over LTE or TIMES) allows you to make calls using our fast 4G network, for a clearer voice call. If it's available 4G call, you can simply dial the number you want to call as normal. You can check the caller 4G coverage using the Cover coverage control. Two excellent ways to stay in touch with O2. The WiFi call can help when you can't get a signal, and both give you great quality calls. In the 4G call areas, they work together to provide a seamless and uninterrupted uninterrupted experience while moving from one to the other, without dropping the call. What phone do I need? WiFi and 4G are available on many of our devices. Check if your device is supported. To find out if your phone runs the O2 firmware * check the configuration instructions for Samsung or Sony. If you need more information, contact us or Business O2 customer services. * The device firmware is essentially essentially the software makes your device turn on and run. Sometimes there are several versions of the firmware for the same device. for android devices, wifi connection and 4g call only work on devices using the firmware o2. device firmware is essentially the software that makes your device turn on and run. Sometimes there are several firmware versions for the same device. how can I pay for the wifi and 4g call? It is no different to make a standard call now. will be charged by your call fee or will be charged at the standard rate if you run out. no additional cost from o2 â€ "one minute is only one minute, no matter how to make the call. 4g calls will not cost you any data. wifi calls use very small amounts of data on wifi connection. if wifi is unlimited or free (like o2 wifi,) then you did not charge something extra. If your wifi connection has an allowance, then it will ocidate from that allowance, and your wifi provider can charge if you go further. multi-party calls: these are loaded as normal but note that each identical part of a multi-party call or conference will appear on the account as a separate call voice. can i oare wifi and 4g calling a sim o2 contract? Yes, you can. wifi and 4g are currently available on many of our devices. check if your device is supported. â personal rate transfer to a SIM-Sym-only contract and you want to add wifi and 4g calls? or go to my o2 to add it to your account at no extra cost or contact us. I would have a business sim contract o2 and you want to add wifi and 4g calls? Contact your account manager, digital consultant, business partner or business customer services to add it to your account at no extra cost. Will my phone automatically call wifi or 4g? when you have wifi coverage, but do not connect to the mobile network, the phone will automatically use the wifi call. iphone the courier's message at the top of the screen will change to â€ œo2 wificallâ€TM. If you have a strong phone signal, the phone will automatically use the call 4g and the carrier will be displayed as â€~4gâ€TM. android the indicator bar will show a wifi/phone icon. if you are in a 4g call area with good coverage, the phone will automatically use the 4g call and the carrier will be displayed as 4g. calls made on wifi will decrease only if you move out of the range and the call 4g is not activated or available. if you are in an area where both the wifi call and the 4g are available, the call will be before 4g. you can check the caller cover 4g using the coverage control. where can I hate the wifi call? you can use the wifi call wherever there is wifi, including wherever there is wifi or2. is free to connect to o2 wifi, but remember that other wifi providers could make you pay to connect, as on certain trains and in some hotels. can I oare the wifi and the 4g call to make calls abroad? the wifi call is not currently supported outside the united kingdom. However, under certain circumstances it may be possible to enable the wifi call while abroad and where additional costs are applied. Â mobile calls will use roaming 2g / 3g and will be charged according to the normal rate. If you are on a personal rate, you can oare o2 travel to stay in touch when you are abroad. If you're on a business rate, you can oate our rest of the world's pass 24 hours to stay connected while you're away. Can I oare wifi and 4g by calling a corporate fee or2? Yes, but it is not available on o2 business mobex, better for business rates or network ratespublic service. Get in touch to learn more. Can I use WiFi and 4G CHIAMARE A PAY AS GO?
