Below are my favorite quotes from Marco Divine 8 weeks for Sealfit: a Navy Seals Guide for non-conventional training for physical and mental tenacity. Success in Kokoro, and in life for that matter, largely depends on one thing: balance. Basic test: the most perfect number, sea style Seal push-up, as you can in 2 minutes 10 minutes of rest, like many sit-ups you can in 2 minutes 10 minutes of rest as many pull-ups, like yes It can first gas out of 10 minutes to rest 500 meters (or replace a 2000 meter line if you don't have access to a pool) 10 minutes of rest 1.5 miles travel record you repetitions and time in a diary training is Passionately applying principles carefully designed to develop physically, mentally and spiritually. Ã, a profound awareness of your worlds is grown and lines these internal and external worlds in a serious force. Ã, you show you as exceptional every day. No serious commitment takes place without a solid base and purpose. My purpose with Sealfit training is growth throughout your life of your physical, mental, emotional, intuitive and spiritual capabilities. Nothing good in life is easily. Ã, achievements is held more dear requires your most valiant efforts. Recognize and love the simple, the good things in life so much make you laugh, cry, or both together. Ã, now connect the same level of passion into your training. Develop the disciplined habit of training. Ã, even count your days off. A constant being, week after week. A training course, to eat, and breathing are the three pillars of optimal health, so as to master now! When traveling, you train. Ã, when it snows, you train. Ã, when you wounded, you train. Ã, understand? Try to run 80% of your programmed workout and refueling targets. Allow a 20% buffer for spontaneous days out of training and day cheat with meals. Ã, life is too short to be rigid and boring. The five human primary potentials, or "mountains", which must be developed for warriors and heads to operate at their peak are: physical control and development of mental force and development emotional awareness and resilience of awareness and intuition Kokoro spirit respects It literally means revisiting or take another look at something. How much more respect your training, more competence and impetus you build. Slow is smooth, smooth is fast. Select a training rhythm that is between slow and fast. Ã, being methodical, propositive, and maintain a relaxed awareness. If you go out to 100 mph and feel frustrated, you will have lost faith and fall. Strove refueling within 20 minutes of a force or a high intensity training session. "Proper prevents prior preparation Pisciano-little efficiency." Moisturizing and refueling must become a discipline. Twisting and flexing mash the internal organs like a washing machine and lead to detoxification of internal organs and cleaning. More energy puts in the gravity of the training session, how to maintain concentration, intensity, and a sense of teamwork, more will get from each session. The Biblical concept of tithe is paid to God in first place, then yourself, then the merchant, and then the tax man. A test for growth - the discipline yourself to spend the first 10% of your day on your mental, emotional and spiritual workout. An empty the cup of learning. A fill with much more value to give to the world. Do you know what integrity is? Ã, it's when you do what you say and say what you think. Be honest in all your actions, large and small. Ã, pay attention to your thoughts. Ã, speak only Of truth that I am also useful and positive. It is, otherwise, remain silent. One let your actions speak your character. Learn to trust your intestine. Ã, pay particular attention to feelings and images that fear stomach or disease whisper. Ã, you could change the course of your life. The Code of Seal Teamwork: loyalty to the country, the team, and the teammate. Serve with honor and outside the battlefield. Be ready to drive, ready to follow, and never stop. Take responsibility for your actions and actions of teammates. Excel as warriors through discipline and innovation. Train to the war, fight to win and defeat the enemies of your nation. Earn your trident every day. Include the importance of every decision you do from here. It is important to ask you what you are willing to sacrifice for the results you are able to reach. How do you answer in a crisis? Are you a leader looking for solutions immediately, or do you reduce you, hoping someone else will get? More you support you in difficult things, the grittier becomes the character. If you relax, lose it. Ã, Grit is earned. Check your passion and purpose every day. "Start doing what is necessary, then what is possible, and suddenly you're doing the impossible." St Francis of Assisi Leadership is difficult to learn if you don't have the character to conduct. Open up to the risk of failure ... There is simply a better way to earn leadership strips. You don't have to be the best in everything, only willing to do your best. Although Sealfit formation can be performed alone, it is more powerful with a team. The team loves him when the boss can beat them in a workout. Ã, you could leave your courage on the floor, but you will earn points along the way. The universe will slow you down if you don't. Trump security is difficult. Balance training to prevent wounds and be intelligent on how to perform the mission. No plan survives first the first contact with reality - you have to adapt and innovate on the fly. The hard work is a habit. Use it or lose it. Expect absolute integrity at all times. The team takes care of the team first, then the swimming companion, and then they themselves last. Because everyone understands the set-up, security, transitions and the needs of the leader, we have become a self-sufficient team. Ã, in seals, everyone is a leader and a follower. Your transition from selfish selfishness has a powerful and positive effect on your own energy. Because you simply cannot take care of someone else in a negative state. A team that is based together remains together. "The good things about prosperity must be desired; but good things belonging to adversities must be admired". Seneca If you can't understand it, you won't do it through the fire. Discover your "because" is how to take a large drink from the well after walking through the desert of the Sahara. He feels like going home. Love and fear are the only two emotions that emerge with us from the uterus. Ã, all other emotions evolve from these two. Hating another is to hate yourself and all life. Watch training as your teammate in human alchemy, driving incessantly towards your highest human potential. The unbeatable mind stands the world is chaotic and dangerous. Destiny favors the preparation in mind, body and spirit. Personal growth must understand the whole person and be integrated to accelerate growth. There is an athlete and warrior in everyone. They differ only in a degree and purpose. Leadership is shown through the example and cultivated in the arena. True learning is experiential and the best learning is through trial and error. Ã, we use what works and discard what not. We treat others with respect, compassion and, if necessary hard love. To qualify for the team you have to have a burning desire to do better every day, to satisfy your commitments and maintain a winning attitude. "If we did all the things we are capable of, we would literally be astonished." Thomas Edison This book must be read to fully appreciate. Ã, (there is an entire appendix on the diet / food alone that is worth the cost of the book) Click on the image below to be brought to Amazon to collect a copy for you. The Welcome this week the Sealfit TV installment. If you are ready to earn the advantage you have to succeed in life, look under. Hooyah, Coach Divine P.s.
