It differs from the general encyclopedia in omitting facts and information that have no relation to the Church. Science, literature, history, doctrine, saints, government, art and more are contained in the 11,000 entries. In all things the purpose of the encyclopedia¨ give all the truth without prejudice, national, political or factional. In determining the truth the most recent and recognized scientific methods are used and the results of the latest research in theology, philosophy, history, apologetics, archeology and other sciences are given careful consideration. No one who is interested in human history, the past and the present can ignore the Catholic Church, either as an institution which has been the central figure of the civilized world for almost two thousand years, decisively influencing its destinies, religious, literary, scientific, Social and political, or as an existing power whose influence and activity they extend to every part of the globe. Robert Appleton Company New York, NY. Publishers are fully aware that there is no specifically Catholic science, that mathematics, physiology and other branches of human knowledge are not nÃ© Catholic, Jewish, nÃ© Protestant; But when it is commonly said that Catholic principles are an obstacle to scientific research, it seems not only proper but necessary to record what and how many Catholics have contributed to each department of knowledge. Designed to present its readers with the full body of Catholic teaching, the encyclopedia contains not only precise statements of whichÃ² the Church has defined, but also an impartial record of different views of the authority on all the contested applications.
