The synopsis hooked me, after all, and being in a huge science fiction football, I added to my library forward audible. Oh boy. Disclaimer: I've given up this book at 20%, about 12 chapters. You might say, "You did not give a chance." But I contrasts, to 20%, had already spent more than four hours and a half! If a book can not connect at that time, there's a problem. Or many problems! Temido the sky moves at a daunting pace, not unlike the tree sap in the cold seasons, the fear of the sky looks quite interesting. Temido the sky moves at a daunting pace, not unlike the tree sap in the cold seasons. The copious exposure is used to describe the "object" object moving through space, the chances of its trajectory and how it would be unlikely to strike the Earth, and if he did, the to have impact with the ground. This part was not uninteresting, but I grew up impatiently, which collapsed through information gobs and waiting for the story to start. Then we are introduced to our main character, or at least one of them. It is a doctoral student working in a USAF monitoring station and dividing his time between complaining about insufficient bandwidth and use of use Computer to look for porn. So that memorable is like a character - that I can't remember the name of him. It should not be wonder, though. If you read the synopsis for the book, not only the entire texture of the book has written for us, but nowhere is any of the characters of the interests mentioned! Seriously? Strange. I know there are many characters, evidently, but a story must turn around a few, strong rumors of the character, and one would think that at least they are included in synopsis. Instead, we are treated for a description filled with spoilers, which as Moss's writing style, does not leave anything for imagination. This brings me to my next point - writing. Moss's prose is not bad, or has a really good editor. But he insists on the spoon to eat every tiny, bit or detail. Everything that he feels he needed to know, we know. You too are sorry, information that are not recognizable to the characters that move the long plot. We call this information not earn, and there are many. There is no nuance, - please do not make a mistake nuance or subtlety for snarky or intelligent writing. Smart or snarky writing for your own good is simply self-serving. During reading, I found myself constantly imagine how the scenes or elements could have been written, and how the right approach could have achieved an incredibly intriguing and mysterious story. But this is alone, there is no intrigue, no mystery. Instead, the third person / omniscient point of view jumps into the head of each character, it tells us exactly what they are thinking, and in the end it does not leave anything for the imagination. Good writers craft stories of people who are close to, or are affected by mysterious consequences, and history takes place around them to reveal the biggest plot at work. This story gives us practically all in advance, holds our hand along the way, as an automatic visit, slow moving, guided. Unlocked achievement: disengaged imagination. For me, once it happens, I officially remove it from the book.R.c Bray is not a horrible narrator. He has a good voice, but I found him tone of him to take a little monotonous, and sometimes, mixed with writing, he cried to me in a amazement. It is one of the first audiobooks I've ever heard that she hasn't kept my attention, and when I realized I've lost something, or being distracted, I wasn't worried about supporting and investigating what I missed. I won't worry about Moss books. Granted, this is all my personal preference. Take a review for what they are, a person's personal reaction. If it is the same, I recommend moving, or giving the sample a good listening. This book is not for everyone. This is the first book, in any vehicle, I have never returned. ... more after finishing the Martian I tried to fear the sky also narrated by R.C Bray. Excellent story and reading, great science fiction. I feel that the second book will be released in July. Does anyone else connected or enjoy this series?
