Twilight 6 saga midnight sun movie release date

Midnight Sun by Stephenie Meyer. Image Courtesy Little, Brown and Company It looks like Twilight Midnight Sun is back in the news again, and this time, for some reason, it appears it's being linked to Netflix on social media.So, I wanted to take some time to clear up a few things about Twilight Midnight Sun, its release date, and if the movie will be available to stream on Netflix.For those who don't know, Midnight Sun is a book by Stephanie Meyer. It's part of the Twilight series, and it tells the story from Edward's perspective, rather than Bella's perspective.We shared everything we know about Midnight Sun below!Is Twilight Midnight Sun on Netflix?There seems to be a lot of confusion about the Twilight Midnight Sun and if it's on or coming to Netflix. The first part is obvious; no, Midnight Sun is not on Netflix right now.If Midnight Sun is coming to Netflix, well, that is a different story. We don't really know, honestly. If the movie is released in theaters or Netflix picks up the rights to the film, it could make its way to Netflix after a year or so. Netflix has added all of the Twilight movies at one point or another, I think, since they were released.Is the Twilight Midnight Sun movie coming in 2021?As far as I can tell, no, Midnight Sun will not be released in 2021. While it may be happening, there are no details about production or anything like that. If production has not started by now, there's no chance Midnight Sun would be released in 2021.Twilight Midnight Sun release dateAccording to HITC, Midnight Sun does not have a release date, and there are still questions about if the movie is even happening, as mentioned above.There's absolutely no chance that Robert Pattinson and Kristen Stewart would be involved if the movie does happen. They're on to bigger and better things in their careers, and they are — I'm very sorry to say — too old to play teenagers in movies in unironic ways.With that said, I think there's probably a good chance this movie gets made at some point. There's so much fan interest in the franchise still. As we've seen in recent years, reboots can work really well!For now, we'll just have to wait and see what happens with Midnight Sun. We'll let you know more when we find out! Next: Best Netflix shows coming in 2021 [Photo via Summit Entertainment] We are exactly one week away from the highly-anticipated release of Midnight Sun. As the fifth book in the Twilight series, Stephenie Meyer announced its surprise release back in May. Now, Twilight director Catherine Hardwicke is revealing if a Midnight Sun film could happen in the future. Read more: Trent Reznor lands first Emmy nomination for 'Watchmen' score Even though we are a week away from its release, Midnight Sun already has a long history in the Twilight fandom. In 2008, a few chapters of the book were leaked online. In response, Meyer publicly posted 12 chapters for fans and said in a blog post that Midnight Sun would likely remain incomplete. However, in a 2015 interview, the author revealed that she had begun working on the Breaking Dawn follow up again. Then, in May, Meyer shared that Midnight Sun is complete and ready to be released. Midnight Sun is a prequel to the Twilight saga, telling the story from Edward Cullen's perspective as opposed to Bella Swan's. Readers get to learn Cullen's past and his experiences as a vampire. In typical fandom fashion, Twihards are already ready to see Midnight Sun on the big screen. Now, Hardwicke is revealing if a Midnight Sun film could actually happen. Hardwicke directed the first Twilight film which was released in 2008. During a new exclusive interview, the director is asked about her experience creating the iconic movie. She is also asked about the highly-anticipated Midnight Sun. In particular, some are wondering if the first film could be recut in celebration of the book's release. For Hardwicke, she says this task would be "difficult." "We did stay a lot more in Bella's head," Hardwicke says in the interview. Read more: Here's why a recent Chainsmokers concert is under investigation Instead, she thinks Midnight Sun would have to be a completely new film. However, getting Kristen Stewart and Robert Pattinson on board may be difficult. "[It] would be fun. It would be fascinating," she says. "Rob is Batman now and Kristen is in a million beautiful projects. Who knows what would happen." In June, Meyer revealed that Midnight Sun features a new scene to the sequence that didn't appear in the original novels. For Meyer, the particular missing scene from the original Twilight story involving the meadow has bothered her for years. "I was able to get back to the story again," she says. "And also write the little missing piece from the meadow that has always driven me crazy!" In the interview, Meyer doesn't say which key detail was missing from the scene. However, she did share why it was originally taken out of the first Twilight book. And then no one ever did, and so it was like, 'okay, I guess it's not that important,'" she continues. Midnight Sun's official synopsis is below. The book arrives Aug. 4 and is available for pre-order here. When Edward Cullen and Bella Swan met in Twilight, an iconic love story was born. But until now, fans have heard only Bella's side of the story. At last, readers can experience Edward's version in the long-awaited companion novel, Midnight Sun. This unforgettable tale as told through Edward's eyes takes on a new and decidedly dark twist. Meeting Bella is both the most unnerving and intriguing event he has experienced in all his years as a vampire. As we learn more fascinating details about Edward's past and the complexity of his inner thoughts, we understand why this is the defining struggle of his life. How can he justify following his heart if it means leading Bella into danger? In Midnight Sun, Stephenie Meyer transports us back to a world that has captivated millions of readers and brings us an epic novel about the profound pleasures and devastating consequences of immortal love. Would you watch a Midnight Sun film? Let us know your thoughts in the comments below. You'd better hold tight spidermonkey! Twilight is coming back. It's been almost a decade since the franchise starring Robert Pattinson and Kristen Stewart concluded with Breaking Dawn - Part 2 thus bringing closure to the Twilight-crazed era. The teen romance is now entering the conversation all over again thanks to a surprising announcement from the writer behind Edward and Bella's story, Stephenie Meyer. This summer she will finally be releasing her fifth Twilight novel Midnight Sun. It's time to decode what we might expect from the coming release of Midnight Sun and how it could spawn another big screen adaptation. Here's what to know: For hardcore fans of the Twilight fandom, Midnight Sun is a familiar book title that brings back nostalgia for the height of the book series' popularity. Back in 2008, it was in the works shortly after the release of her last Twilight novel Breaking Dawn and amidst Twilight's debut in theaters. Twelve chapters of a draft of Midnight Sun was leaked online for tons of fans to peak at. Stephenie Meyer was in the middle of writing the book at the time and not happy it was put out into the public without her consent. She stalled her work on the fifth Twilight book and published a completed draft of the first 12 chapters on her website. Back in 2008, here's what Meyer left things with Midnight Sun per EW: It's really complicated, because everyone now is in the driver's seat, where they can make judgment calls. 'Well, I think this should happen, I think she should do this.' I do not feel alone with the manuscript. And I cannot write when I don't feel alone. So my goal is to go for, like, I don't know, two years without ever hearing the words Midnight Sun. And once I'm pretty sure that everyone's forgotten about it, I think I'll be able to get to the place where I'm alone with it again. Then I'll be able to sneak in and work on it again. Twelve years later and here we are: Midnight Sun was officially given a release date on August 4, 2020 following a mysterious countdown clock that had fans theorizing about Meyer's plans. As the author explained in her announcement, she is not "the same person" she was then, since becoming a parent and the world changing. So there's a chance the Midnight Sun many fans read back in the day may not be the same material that was leaked. Midnight Sun stands apart from the rest of the Twilight saga because it is not a continuation of the story told by Bella Swan – it's Twilight again from the perspective of Edward Cullen. Instead of telling the story of a teen girl that moves from Arizona to Forks, Washington and gains curiosity for a vampire in her class, the events of the first book are given a shake up. From Edward's eyes, he's bored of being at yet another high school until he catches wind of Bella's scent. Fans will get to be inside Edward's head this time around as they meet each other and fall in love. This time the whole "discovery" montage Bella has to go through to get caught up with the audience is unnecessary. Where was Edward during all those weeks where the Cullens' disappeared on hunts? What was he thinking about during all those awkward first encounters with Bella at school? What's it like in the brain of a mind-reading hundred-year-old vampire. This is the kind of bonus content fans will get answers to in Midnight Sun. Since Midnight Sun is written from the perspective of Edward Cullen, Twilight becomes something quite different than what was originally written. At its heart, Twilight was a unique spin on the teen romance that explores feeling uncomfortable and a fish-out-of-water in high school. In Edward's case, yes he feels different from his peers, but one would imagine the story is more about a hardened vampire who is just going through the motions, until Bella complicates his life. The story is still a romance but since fans will be living inside Edward's head for the duration of Midnight Sun, they will have access to much more vampire lore than Bella could have ever offered. While Bella Swan's narration was a beginner's guide to Meyer's world of vampires, Midnight Sun could be a more advanced and complex look into the lore she has created for the franchise. Is it too early to talk about a Midnight Sun movie? Maybe, but look at what happened to the coming Hunger Games prequel. Lionsgate has already signed a movie deal with Suzanne Collins for it to become a movie before it has even been released. Chances are for now Midnight Sun is a more of a book for the fandom after years without the entire fifth book. But what if the book flies off bookshelves and revitalizes the Twilight era? It would make it the optimal time for Summit to jump back into the property that made them $3.3 billion worldwide. A Midnight Sun movie is possible, but it would act as something of a Twilight remake with a brand new cast portraying the teen characters since they are in their 30s now. It could be a clever way to approach a remake for the property because it would give fans more content than 2008's Twilight could. Midnight Sun could be made completely from Edward's perspective or it could switch between his and Bella's POV. Considering all the information between the two books, it might work well as a TV mini series that swaps between their personal perspectives. In the eight years since the Twilight saga has concluded, Kristen Stewart and Robert Pattinson have been able to carve out careers past the teen franchise that stand apart from their early work. Pattinson is just about to become the next Batman and star in Christopher Nolan's Tenet and Stewart has made a ton of indie films and most recently was in Charlie's Angels and Underwater. If Midnight Sun became a movie, they have a great excuse to not return because they are too old to play eternal teenagers, but maybe they could cameo or take on another part in the film? They could be a great Esme and Carlisle … or another pair of the actors from the original movies (like Jackson Rathbone and Nikki Reed) could take on those characters. We'll have to wait and see how it all unfolds. Midnight Sun hits bookshelves on August 4, 2020. Stay tuned here on CinemaBlend for more news on your favorite film franchises. By Jess Cohen Aug 04, 2020 4:04 PMTagsMoviesTwilightBooksCelebrities "Twilight" Author Stephenie Meyer Releasing Prequel "Midnight Sun"Midnight Sun is finally here! Stephenie Meyer has officially released the companion novel to 2005's Twilight after years of anticipation from fans around the world. Midnight Sun, which became available for purchase on Tuesday, Aug. 4, is told from the perspective of character Edward Cullen. So this time around, Twihards will get to experience the same events but through his eye instead of Bella Swan. In 2008, Meyer pressed pause on writing Midnight Sun after her unfinished manuscript was leaked online. The author later released her 12-chapter tease on her website, but didn't officially continue writing until years later. In May 2020, the 46-year-old novelist delighted fans when she announced the book was complete. "It's a crazy time right now and I wasn't sure if it was the right time to put this book out, but some of you have been waiting for just so, so long," Meyer said on Good Morning America. "It didn't seem fair to make you wait anymore."There is more to celebrate, too. This October will mark 15 years since the release of Meyer's first Twilight novel, which follows the love story of 17-year-old Bella and classmate Edward, who she later learns is a vampire. The popular series went on to be adapted into five Twilight movies, starring Kristen Stewart and Robert Pattinson. Like Edward and Bella, the duo dated off-camera for about three years before calling it quits in 2013. In honor of Midnight Sun's release, let's take a look back at the cast of Twilight, then and now:Summit Entertainment/Entertainment Pictures via ZUMA, Getty ImagesIn between making five Twilight films, Stewart starred in smaller projects such as Adventureland and The Runaways, in which she played pioneering rocker Joan Jett. Before the saga concluded with Breaking Dawn Part 2 in 2012, Stewart was another force to be reckoned with in Snow White and the Huntsman, playing an armor-clad version of the Brothers Grimm-and-Disney heroine. A photograph of her sharing a tender moment (and nothing beyond that, she has since said) with her married director Rupert Sanders broke the Robsten-shipping hearts of the world (and preceded Sanders' divorce), but years after making up and breaking up again with Twilight co-star Robert Pattinson, she still thinks he's the greatest. "We were together for years, that was my first [love]," she told Howard Stern in 2019. Stewart starred in a slew of juicy independent films, becoming the first American woman to be named best supporting actress at the César Awards, the equivalent of the Oscars in France, for Clouds of Sils Maria, and became a face of Chanel. Most recently she starred in the Elizabeth Banks-directed reboot of Charlie's Angels and the deep-sea sci-fi thriller Underwater and played troubled actress Jean Seberg in the indie drama Seberg. In December, she starred as Abby in Hulu's historic Happiest Season. Next, she'll take on Princess Diana in Diana. Stewart also told Stern that she couldn't "f--king wait" to propose to her girlfriend, screenwriter Dylan Meyer, but didn't want to spill all the details on the radio.Summit Entertainment/Imprint Entertainment/Entertainment Pictures via ZUMA, Getty ImagesPerhaps even more so than Stewart, Pattinson has worked to distance himself from his star-making turn as the brooding vampire Edward Cullen—though he told E! News he would "always appreciate" what the Twilight franchise did for his career. He was the romantic lead in 2010's Remember Me and 2011's Water for Elephants, but since then he's been sticking primarily to the down-and-dirty depths of the human soul in the likes of Maps to The Stars, The Rover, Good Time and 2019's The Lighthouse, in which it's just Pattinson, Willem Dafoe and some really sordid nightmares. Of course, all of that is out the window now that he's playing the Caped Crusader himself in The Batman featuring a who's who of Hollywood and DC Comics villainy. As of now, that's due this year. Following his notoriously public split from Stewart, Pattinson has predominantly kept quiet about his dating life. He was engaged for awhile to FKA twigs before they broke up in 2017, and in January 2020 engagement rumors caught up with him and his girlfriend, Suki Waterhouse. "If you let people in, it devalues what love is," Pattinson explained his approach to dating as far out of the public eye as possible to the Sunday Times in April 2019. "If a stranger on the street asked you about your relationship, you'd think it extremely rude. If you put up a wall it ends up better."Summit Entertainment/Entertainment Pictures via ZUMA, Chelsea Lauren/Variety/ShutterstockAfter captivating the hearts of Team Jacob, the buff actor went the action hero route in the John Singleton-directed Abduction and showed off his comedic chops in Grown Ups 2 and the Netflix movie The Ridiculous 6, both with Adam Sandler. On TV he starred in BBC Three's Cuckoo and the second season of Ryan Murphy's horror-comedy Scream Queens—where he met Billie Lourd, who he dated until 2017. Lautner made it Instagram official with girlfriend Taylor Dome in 2018.Summit Entertainment/ Entertainment Pictures via ZUMA, Getty ImagesThe actor, who played Cullen family patriarch Carlisle, has largely stuck to the small screen since his Twilight days. Facinelli was already working on Showtime's Nurse Jackie while filming Twilight, which he stayed on through its last season in 2015. Since then he's been on American Odyssey, Supergirl, S.W.A.T., FBI and the new Magnum P.I., and in 2019 he starred as cult leader Keith Raniere in the ripped-from-the-headlines Lifetime movie Escaping the NXIVM Cult: A Mother's Fight to Save Her Daughter. Facinelli has three daughters with ex-wife Jennie Garth. On Jan. 2, 2020, his rep confirmed he had gotten engaged to Lily Ann Harrison while on vacation in Mexico over the winter holidays.Summit Entertainment/Entertainment Pictures via ZUMA Press, Getty ImagesThe actress who played vampire family matriarch Esme Cullen blossomed on TV after the big-screen saga ended, showing up in The Good Wife, True Detective, Mad Men, Law & Order True Crime: The Menendez Murders and Manhunt. Her biggest splash since, however, has been starring on the binge-worthy Netflix horror series The Haunting of Hill House, and she joined the dystopia on the third season of Hulu's The Handmaid's Tale. Outside of film and television, Reaser is also an accomplished stage actress and she keeps a tight lid on her private life.Summit Entertainment/Entertainment Pictures via ZUMA, Getty ImagesAfter his turn as the beefy Emmett Cullen, Lutz loaned his voice to the titular hero in 2013's animated Tarzan, then starred in The Legend of Hercules and was one of the new guard of action heroes in The Expendables 3, both of which came out in 2014. Also that year, he reprised his role of Chris MacNess when The Comeback returned to HBO. His most recent movie role was playing "Captain F--ktastic" in the comedy What Men Want, and now he stars on the FBI spin-off, FBI: Most Wanted, which just premiered in January 2020 on CBS. In 2017, Lutz tied the knot with model and TV host Brittany Gonzales. Seven months after sharing she had suffered a pregnancy loss at six months, the couple announced they are expecting. "Thank you all for lining with us, praying for us, supporting us," he shared. "We're so excited." In Feb. 2021, they welcomed daughter Ashtyn.Summit Entertainment/Entertainment Pictures via ZUMA Press, Getty ImagesThe actress who played the ever-positive Alice Cullen has appeared in a number of films since Twilight. Her biggest post-Twilight movie was 2019's Bombshell, about the sexual harassment scandal that ended the career of Fox News president Roger Ailes. Greene played Fox & Friends Weekend co-host Abby Huntsman. She also starred in the 2019 Hallmark Channel movie Christmas on My Mind. In 2018, Greene married her longtime boyfriend Paul Khoury in a private, star-studded ceremony in Northern California. Summit Entertainment, Getty ImagesTwilight's Rosalie Hale continued to act in small films and TV, enjoying recurring roles on Fox's Sleepy Hollow and most recently V-Wars with husband Ian Somerhalder. She married The Vampire Diaries star in 2015 and they welcomed their first child together, a daughter named Bodhi Soleil Reed Somerhalder, in 2017. Reed also founded a sustainable jewelry line called BaYou With Love.Summit Entertainment/Entertainment Pictures via ZUMA, Getty ImagesAfter being in the band 100 Monkeys from 2008 to 2012, the actor who played Jasper Hale continued doing TV and small movies after the Twilight Saga ended, but also focused on making more music, dropping a solo album called American Spirit Blues. In one of those odd twists of fate that luckily turned out OK, Rathbone was aboard a Jetblue flight in 2014 that had to make an emergency landing after an engine explosion. He tweeted all about it, including how he and his wife since 2013, Sheila Hafsadi, and then-2-year-old son, Monroe, had to exit via the emergency slide. He makes his home in Austin, Texas, with Sheila and their three children: Monroe, daughter Presley and son Felix, who was just born in January 2020. A video he posted of himself on April 7, 2020, playing his guitar merited a comment from his Twilight sister Nikki Reed, who wrote, "Omg this made me miss you! Thinking of Portland and the many late nights watching you play 25 interments at once and totally in awe of your multi-tasking skills."© Imprint Entertainment/Entertainment Pictures via ZUMA Press / Gabriel Olsen/FilmMagicRevenge for the villainous tracker vampire James' demise is what drives the rest of the Twilight series action (that and Bella's torturous romantic decisions), so it could've been difficult for Gigandet to shake the association. But he pressed right on, appearing in a slew of movies, most notably Easy A and Burlesque, and he was in the 2016 remake of The Magnificent Seven. More recently he starred in the Audience Network crime drama Ice, which ran for two seasons. Gigandet is also a father of two daughters, Everleigh and Armie, and son Rekker with his fiancée Dominique Geisendorff. Summit Entertainment/Entertainment Pictures via ZUMA, Getty ImagesThe vengeful Victoria was played by Lefevre for two of the films before being replaced by Bryce Dallas Howard—which Lefevre maintained came as a shock, but which Summit Entertainment insisted was due to the actress taking a role in an independent film that meant she wouldn't be on set when they needed her. "Never did I fathom I would lose the role over a 10-day overlap," she stated at the time. Since then, the Canadian actress has done a bunch of TV work, most prominently in the hit CBS series Under the Dome, based on the Stephen King book, which ran from 2013-2015. Lefevre married chef Chris Crary in 2018 and they have a son together. "I used to joke I'd have to take up marathon running to stay married to him, because when he flirts with me he does it through food," the apparently well-satiated actress said on Rachael Ray in 2019 when she was promoting the Fox legal drama Proven Innocent, which ran for a season.Summit Entertainment/Entertainment Pictures via ZUMA, Getty ImagesAfter playing Bella's a-little-bit-jealous pal Jessica Stanley in 2008's Twilight, Kendrick was nominated for a supporting actress Oscar for 2009's Up in the Air and ended up top-lining the Pitch Perfect franchise. The Broadway veteran has done seemingly all the genres: movie musicals (The Last Five Years, Into the Woods), comedy (Mike and Dave Need Wedding Dates), action thriller (The Accountant) and murder mystery (A Simple Favor)—and is fairly ubiquitous in commercials. Kendrick also published a memoir, Scrappy Little Nobody, in 2016, and has reprised the role of Poppy in the animated sequel Trolls World Tour.Summit Entertainment, Getty ImagesThe actress who had a small role as Bella's kind friend Angela went on to more undead antics as Rosita on The Walking Dead. These days, she has the stage all to herself playing iconic Tejano pop star Selena Quintanilla in Netflix's Selena: The Series.
