One of the problems of the consistency of this game is the fact that there seems to be a frames problem. About every 3 seconds the game seems to get off 30frans to about 20 frans, his rather annoying at the beginning, but you will use it, so you will actually have the same in this game Fluid as you did in the most sought after or in carbon. Another problem is that opponents A.I. It doesn't seem to have improved. They avoid you and they wander you, this is normal, but they don't see traffic that don't even change the directions when an incoming car is approaching. But one of the features that is very fun is the policeman, they are a little more intelligent than more But there's still a little out, they too seem to avoid traffic. One of the things I love under cover is the fact that you can run 5 other opponents and get the policemen, the maximum number of policemen is 3, so it seems that yours from 8 other people, add a lot of emotion to the game. But unfortunately under cover is still the same old old man, "they still brought some cars of the previous games, and also seems sounds. But the game is quite nice despite its problems. As a NFS fan that has been reproduced NFS as © Hot Pursuit (PSX), I have to say that this will be a fun game for those who have been around the NFS scene for a while, but it may not be so beautiful for newcomers. Overall it's big enough, and this is ¨ The reason why I give a 7 out of 10. ... Expand Need for Speed: Undercover ROM download for PlayStation Portable (PSP).
