Each subproject has its own bug tracker. See this JIRA for some further possible developments ¢ÃÂÂFeel free to add Own articles here: See Contribute. Collaborators The last year is committed forks Stars full portability (100% pure JVM: Java & Scala) Built with Java 11 and running on the RA 11 of Java. Report errors: Here you can enter an error found, share your point of view about a specific feature or anything else ... Guice adoption calendar: Promote the GUICE artifacts on the download page as part of the artifact 3.7 .0 Deprecity Spring as part of the artifact 3.8.0 Remove Spring as part of the Â '4.0.0 Ã ¢ â † Continue to improve the JMAP RFC-8621 support. In addition, we will allocate servers at cases of use identified, formulated in non-technical terms: Basic server, advanced server and distributed server. After a review, and exchanges with you, an Apache James developer will integrate the changes once it matches our policies. See our download page. Ã ¢ Â † Á 'Main objectives Ã ¢ â † Provide a distributed mail server, fully scalable horizontally. Finally, create your problem. You can also contribute! Thus, we always want to listen to people with contributions to the code, documentation, website and error reports. It also includes a default domain named James.Local and three default users: user01@james.local, user02@james.local, user03@james.local, with the default password 1234. For other projects, click on corresponding links mentioned in the corresponding subproject. The Apache Software Foundation James means Java Apache Mail Enterprise Server! This image of James has a default configuration ³ using JPA (hsqldb) and Lucene. At LINAGORA, we chose JAMES as our ³ mail distribution agentÂ OpenPaaS product: To facilitate the ³ management of e-mail load balancing and high availability To enable single e-mail interactions with the platform To use the JMAP protocol (the browser interactÃÂ ÂÃ a directly with the mail server) Our implementation ³ currently allows serving a hundred users through JMAP, SMTP and IMAP. We rely on checkstyle for ³ checking. Mailing list: Subscribe to the appropriate mailing lists based on your interests and profile. The mailing guidelines explain to you with more precision³ how ³ works. The spring server will become obsolete. How ³ contribute to the changes of ³ I say: Read our Apache Git feeds. Contact us by email or ³ Gitter to share your experiences. To meet the quality expectations of our community, we apply coding standards ³. standards.
